PLAYING NHL '95

STARTING THE GAME

1. Turn OFF the power switch on your Super Nintendo Entertainment System®.

   WARNING: Never try to insert or remove a Game Pak when the power is ON.

2. Make sure a Controller is plugged into Controller Socket 1 on the Super NES®.

   If you're playing against a friend, plug the other Controller into Controller Socket 2.

3. Insert the NHL '95 Game Pak into the slot on the Super NES. Press firmly to lock the Game Pak in place.

4. Turn ON the power switch.

   The EA SPORTS™ logo appears. If you don't see it, begin again at step 1.
If you want to get into the game right away, go straight to the section below called Playing for Real.

But if you are starting NHL '95 for the first time, you might want to watch an exhibition game.

1. Select EXHIBITION on the game setup screen.
2. Press Select to see the Controller Setup screen. Move all controller icons to the center CPU column. This instructs the computer to play all players.
3. Press START to see the Team Matchups screen.
4. Press START. Unless you change the settings, Vancouver plays the New York Rangers at Madison Square Garden in an exhibition game with three 10-minute periods, no penalties, no line changes. User record recording is off, and Goalie Control is set to Manual.

To get out of Demo mode, press any button except START. The Game Setup screen reappears.
PLAYING FOR REAL
Options and Settings

Play Mode

Exhibition: Play a single game using the teams as they were at the end of the 1994 season. When you have chosen an Exhibition With Trades, you can play a single game using the teams altered by trades you have made.

Practice: Set up a practice session with up to two skaters (plus goalie) per side.

Season: Begin a new season. NOTE: This erases your previously saved season. Also, continue your saved season at the point you left off. NOTE: Only one season can be saved at a time.

Trades: Trade players between the two selected teams.

Free Agents: Assign currently available players to a team.

Release: Move players from rosters to the Free Agents list.

Make Player: Create a new player that is saved on the Free Agents list.

The Home team is on the right side at the top of the Game Setup screen, and the Visitor is on the left.

The Home team always wears the light-colored jerseys, and the Visitor wears dark colors.

The Home team faces up-screen in the first period and third periods, down-screen in the second period.

Period Length

Each game consists of three periods, and one or more overtime periods if necessary. Set the period length at 5, 10, or 20 minutes.
An *Exhibition* game allows only one overtime period. The overtime period lasts for ten minutes, or until one team scores ("sudden death"). If neither team scores, the game ends in a tie.

**Playoff** games cannot end in a tie. Players will play as many sudden death overtime periods as necessary to establish a winner. The overtime periods last as long as the period length selected for that game or until one team scores.

**Goalie Control**

*Manual:* You can control your own goalie.

*Automatic:* The computer controls your goalie when he doesn't have the puck.

**User Records**

*On:* Saves your all-time records.

*Off:* Doesn't add to your all-time records.

**NOTE:** You must have User Records ON to log records. Only results of winning games are saved.

**Penalties**

*On:* The referees call all the penalties and infractions they see. (See Penalties and Infractions.)

*No Off-sides:* The referees call penalties and infractions, except off-sides.

*Off:* The game will not be interrupted by penalties or off-sides. ICING IS ALWAYS CALLED.

**Line Changes**

*On:* The player/players control their team's line changes (see Line Changes).

*Automatic:* Computer changes lines for both teams. Players do not tire.

*Off:* The players do not tire and stay in for the entire game.
Rosters

**Default:** Computer-chosen teams.

**With Trades:** User-updated teams (with created players, released player, signed players and trades).

**TEAM AND PLAYER STRENGTHS**

All the NHL teams are represented in *NHL '95*.

Every player in the game has certain strengths and weaknesses, based on their real performance in the 1993/1994 season.

**TEAM MATCHUPS SCREEN**

Before the game begins, the Matchups screen appears. On this screen, opposing teams and starting players are compared. Team and player ratings range from 25 (bad) to 100 (excellent).

**Player Ratings**

At the Matchups screen, press A or Y to see player ratings of the two teams currently competing. Press START to go to the next screen.
The Scoreboard
The scoreboard lists all your game options. See page 18 for full descriptions of these options. Press START to begin playing.

THE FACE OFF

At the top left of the screen you see a close-up window of the two centers and the referee holding the puck in the air.

When a ref drops the puck, you can:
- Hold the Control Pad in the direction you want to pass, then press B
- Control Pad forward and press A to capture puck.

SKATING
OFFENSE (Your team controls puck): With controller 1, your puck carrier skates on a solid blue star with a dark blue outline. The computer’s puck carrier skates on a solid blue star with no outline. If you’re using controller 2, your outline is red.

DEFENSE (Other team controls puck): If you’re using controller 1, your active player skates on a star outlined in blue. If you’re using controller 2, your outline is red.

- Press B to activate player nearest to the puck.
• Control the direction of your player with the Control Pad.

PASSING
• Hold Control Pad in the direction you want to pass, press B.

If you do not hold the Control Pad, the player passes the puck in the direction he is facing. The best passing method is to press the B button, then press down on the Control Pad, then release the B button. The pass is launched when the Control Pad is pressed while the B button is down.

If the player you control is off-screen, an arrow points to the location of that player.

When playing in Two Player modes, the blue arrow indicates the Controller 1 player, the red arrow the Controller 2 player.

On medium to long range passes, press B immediately after you pass the puck to control the target player before the puck arrives to evade defenders and pick up the puck in the clear.

SCORING
One point is awarded per goal.
• To take a shot on goal, press A when you have the puck.
• Use the Control Pad to aim puck left/right/up/down.

There are two different shots: wrist shots and slapshots.
• Wrist Shot: Press and release A quickly.
  A wrist shot is slower but more accurate than a slap shot.
  Wrist shots are most effective when close to the goal.
• Slap Shot: Hold down A.
  A slap shot is harder, faster, but less accurate than a wrist shot.

The longer you hold down the A button, the harder the slap shot.
• Control Pad up to give shot height.
• Control Pad **down** to keep shot low.
• Control Pad **left** or **right** to shoot into the corner of the net.

**GOALIE CONTROL**
Goalie Control gives you control of the goalie even when he doesn't have control of the puck.

**To activate Goalie Control:**
1. At the Game Setup screen, Control Pad down to **Goalies**.
2. Control Pad **right** or **left** to set both Goalies on **Manual Control**.

To control a Goalie, hold the X button down until he has the control star under him, then:
- Control Pad any direction to move him and to aim a pass.
- Y dives
- B passes
- A saves

**ABOUT ONE-TIMERS**
A One-Timer is a maneuver between two teammates: Player A has the puck, passes to player B, who lets the puck ricochet off his stick in an attempt to score without taking control of the puck.

**To attempt a one timer**, press B to pass to a teammate, then as soon as the puck is free from the passer, press A. Again, the action is very quick.

When there are two users on one team, the pass receiver can press A to perform a one-timer.
MAKE PLAYERS
To create a player:

1. At the Game Setup screen, Control Pad up/down to highlight PLAY mode.
2. Control Pad right/left to select MAKE PLAYER and press START.
3. Choose a name for your player and press START. The Modify Ratings screen appears.
4. Select your player's attributes, then press START.
5. If you like, assign ratings from 25 (poor) to 100 (excellent) to your player.

FREE AGENTS
To sign a player:

1. At the Game Setup screen, Control Pad up/down to highlight PLAY mode.
2. Control Pad right/left to select FREE AGENT, choose the team, and press START.
3. Control Pad to highlight the player you want to sign and press B to select or deselect.
4. Press START to hire player.

RELEASE PLAYERS
To release a player:

1. At the Game Setup screen, Control Pad up/down to highlight PLAY mode.
2. Control Pad right/left to select RELEASE. Choose a team, and press START.
3. Control Pad to highlight the player you want to release and press B to select or deselect.
4. Press START to release player.
**TRADE PLAYERS**

To trade players:

1. At the Game Setup screen, Control Pad **up/down** to highlight PLAY mode.
2. Control Pad **right/left** to select TRADES.
3. Highlight the teams that will be trading and press **START**. The Trade Players screen appears.
4. Control Pad **up/down** and press **B** to select the player(s) from Team 1 that you wish to trade.
5. Press **Y** to switch to team 2.
6. Control Pad **up/down** and press **B** to select or deselect the player(s) you'd like to trade and press **START**. The players have been traded.

Your trade must be ACCEPTED. It can be REJECTED if the trade is unfair.

**PENALTIES**

When the Penalties option is On, the referees call all the penalties they see.

**Penalty Shots**

Penalty shots are awarded when a penalty is committed on the breakaway man (puck carrier that initiates the breakaway). There is a ding sound when a breakaway has occurred.

One player is released from the penalty box when the opposing team scores on a Power Play.
Number 09 has skated across the blue line with the puck when his
teammate was already in the attack zone. The puck must enter the attack zone before any player on the offensive team enters the attack zone, or off-sides will be called.

A referee window will pop up to warn you that you are about to have a man off-side.

The referees always catch the off-sides infraction (when you have it ON) and stop the action. The puck is faced off behind the blue line.

**INJURIES**
Sometimes a player takes a vicious hit and must leave the ice for a period or the whole game. He is automatically replaced by a player best suited to play his position.

**LINE CHANGES**

If you want to make line changes, set Line Changes to ON on the Game Setup screen.
Fatigue bars on the right side of the line-name show how fresh (or tired) that line is. The longer the bar, the fresher the line.

You can make line changes whenever action is stopped (end of period, penalty, goal, face off, etc) or whenever you control the puck.

Before each face off, the Line Change window will appear on the screen for a few seconds. Press the letter corresponding to the line you want on the ice.

If you don’t press a button, the line next to the letter “Y” will take (or remain on) the ice.

Unless a Power Play is beginning or ending, the line currently on the ice is listed next to the letter ‘Y’. (See Power Play Lines and Penalty Killing Lines for more information.)

To change lines during play:
- Press and hold Select to bring up a window of the currently available lines and their fatigue bars.
- In the window, press Y to select line ‘Y’, B for ‘B’ and A for ‘A’.

**Scoring Lines and Checking Line**

Sc1 starts every game. You can change to Sc2 or to the Chk line as soon as you have the puck or when a face off occurs.

The Chk line is your “big” line, generally slower but harder hitting and better on defense.
Power Play Lines

Whenever one team has at least one more player on the ice than the other team, that team has a Power Play. The Power Play Line (PP1, PP2) is the group of players that specialize in putting the puck in the net.

Penalty Killing Lines

The Penalty Killing Lines are made up of the best defensive players on the team.

SCOREBOARD MENU

The Scoreboard menu provides a wide range of choices available during play or between periods.

- Press START during play to bring up the Scoreboard menu.
INSTANT REPLAY
To see an instant replay:
- Press START to pause the game. The Options menu appears.
- Control Pad down to Instant Replay.
- Press B.
The replay is automatically rewound as far as possible. A box appears showing VCR-style control instructions.
- Press B to roll replay (normal speed).
- Press B to stop replay.
- Press and hold X to play replay (slow motion); release to stop.
- Press A for fast forward.
- Use Control Pad to move the view around the ice.
- Press Y to rewind to the replay; release to stop. You will see the action in reverse at high speed.
- Control Pad any direction until the cursor is over a player and his number and position are displayed to activate "Iso mode". In Iso mode, you can have the replay follow his actions throughout the replay, or move the cursor around the ice to see the positions of other players at the time of the replay.
- Press START again to return to the Game.

EDIT LINES
In NHL '95, you can edit a team's lineup. When line changes are off, you can edit only Scoring Line 1 (this is the only line that's on the ice).

1. Press START before or during play to bring up the Scoreboard Menu.
2. Highlight Edit Lines and press B.
3. Use the Control Pad to highlight the player on the line you wish to remove.
4. To select a highlighted player, press B. A list of substitutes eligible to play that position appears.
5. Highlight a player from the eligible substitutes list.
6. Control Pad left/right to toggle through the various ratings categories to assess the qualifications of that player.
7. When you've decided which player you wish to substitute, press B.
8. Repeat the process for each substitution you wish to make, then press START.

**Change/Remove Goalies**

Goalies do not tire, but if yours is not performing up to your standards, you can change goalies.

- Press START to go to the Scoreboard menu.
- Control Pad down to Change Goalie and press B.
- Control Pad to alternate goalie (or to None) and press B.
- Press START to resume play.

If you remove your goalie (leaving the net undefended) a forward is substituted in to give you an extra player up front for a better chance of scoring.
Manual/Auto Goalie Control

Pressing B while this option is highlighted, will switch between Manual and Auto Goalie Control.

Auto Goalie
Auto goalie control lets you concentrate more on strategic checking and defense—good for beginners.

Manual Goalie
Manual goalie control is for more advanced players who are very skilled with defense and are ready for full control. To get control of the goalie, hold X until an outlined star appears under him. You have control once the star appears.

- Control Pad left/right to choose direction.
- Press Y to dive
- Press B to poke check
- Press A to attempt a save

Time Out
Highlight TIME OUT and press B. Call a time out when you have the puck and want to rest your best line during a break in play. You are allowed only one time-out per game.

QUIT Game
Highlight QUIT GAME and press B. Quit Game ends your current game and returns you to the Game Setup screen. NOTE: This option cancels all results, which means they go uncounted for season or for playoffs.
Game Statistics

At any point during the game, you can take a look at the current game statistics.

- Press **START** to bring up the Scoreboard menu.
- Control Pad **left** to display the Stats menu.
- Highlight Game Stats and press **B** to bring up the Game Stats screen.

Each team’s current game statistics appear beneath the team’s name.

**Score**: Number of goals scored.

**Shots**: Number of shots taken on the goal.

**Shooting Pct**: The percentage of shots-on-goal that scored.

**Breakaways**: Scores on breakaways/number of breakaways.

**One-Timers**: Number of One-Timers that scored/number attempted.

**Penalty Shots**: Penalty shots scored/shots attempted.

**Faceoffs**: Number of face offs won.

**Body Checks**: Number of body checks delivered even after the whistle blows.

**Attack Zone**: Amount of time spent in the Attack Zone. (see p.15 for more on the Attack Zone.)

**Passing**: Number of passes successfully received/number of passes attempted.
Passing Pct: Percentage of passes successfully completed.
- Press START to exit the Game Stats screen.
- Press START again to return to the ice.

Period Statistics
You can check period statistics for either team at any time during play.
- Press START to bring up the Scoreboard menu.
- Control Pad left to display the Stats menu.
- Highlight Period Stats and press B to bring up the Period Statistics screen with Goal stats displayed.
- Press B to see the Shots stats for the period.
- Press START to return to the Scoreboard menu. Press START again to return to the ice.

Player Statistics
You can check individual players' game statistics for either team at any time during play.
- Press START to bring up the Scoreboard menu.
- Control Pad left to display the Stats menu.
- Highlight Player Stats and press B to bring up the Player Statistics screen.
- Press Y to bring up the stats for the opposing team.

There are two ways to look at the statistics—by player or by statistic. You may want to look at how well a particular player is doing in general.
- Control Pad up/down to find the player whose stats you wish to see (if that players is not among the first eleven shown).

G—Goals scored
A—Assists made
PT—Points earned (Goals + Assists)
SH—Shots on goal
PM—Penalties in minutes
Or you can rank the players in order of their performance in the various categories. For example, if you want to see which players have taken the most shots on the goal, select Shots. The player with the most shots on goal will appear at the top of the list, followed by the player with the second most shots on goal, and so on.

- Control Pad left/right to toggle through the different statistics categories.
- Press START to return to the Scoreboard menu.
- Press START again to return to the ice.

INFO
- Press START to bring up the Scoreboard menu
- Control Pad left to display the Info menu.

Team Roster
On the Team Roster screen:
- Control Pad up/down switches lines
- Control Pad left/right switches statistics
- Y switches teams

The area on the center of the screen indicates which Scoring Power Play and penalty lines each player is on. A player who is listed on both Penalty Killing lines is on the ice for one and the first player off the bench in the event of a delayed penalty for the other.
